

Delta Lloyd Gate Race Follow-Up - Jun 16, 2009

.....The problem this day was too much wind. There were slight showers and nice pressure of about 18 or so knots in the North Sea. 18 knots is no problem on the 40, just about at reef point, and we fully ready to send it! The problem is, safety is a priority with guests on board, and we had some important people to take out that day, including the incredibly beautiful **Susanne Dijksterhuis** from the popular show **Wannahaves**. <http://www.johncaseyworldwide.com>
